1 because game has been implemented but not integrated yet into a page on wordpress site; few plugins are also implemented	20.00%	Readibility	All functionalities for games and plugins are commented well	Most functionalities for games and plugins are commented well	Some functionalities for games and plugins are commented well	Very few functionalities for games and plugins are commented well	no functionalities for games and plugins are not commented	Kyle is working on the game and improving the functionality for it	Kyle has found a stackoverflow solution for the game to track user points and is on his way to implement the solution. He is also working on making the game more reactive for the user experience	
4 because plugins are updated and game is made with design patterns and functional programming	20.00%	Maintainability	All plugins are updated; entire game is made with design patterns; game is made with functional programming	Most plugins are updated; most of the game is made with design patterns; game is made with functional programming	Some plugins are updated; some parts of game are made with design patterns; game is made with functional programming	Very few plugins are updated; very few parts of game are made with design patterns; game is made with functional programming	None of the plugins are updated; very few parts of game are made with design patterns; game is made with functional programming	No fix needed	no fix needed	
4 because all documentation is in order and provide an accurate description for the project overall	20.00%	Documentation	All Documents are in order and prove an acurate description	Most of the Documents are in order and prove an acurate description	Some of the Documents are in order and prove an acurate description	Very few of the Documents are in order and prove an acurate description	None of the Documents are in order and prove an acurate description	No fix needed	no fix needed	

1 because we are still in edit mode and dont know how the server will run officially	20.00%	Scalability	Main Server with back up servers ready to handle increased traffic	Main Server Running Optimized	Main Server running	Main Server Running (Edit Mode)	No Servers Running	The entire team will try to fix this issue stay in contactwith nameCheap our service provider	hasnt been fixed yet because we are still in edit mode	
3 because Pages are clearly labeld and intutive to most users how ever the comments page needs to be adjusted	20.00%	Usability	All pages are easy and intutive to use	Most pages are easy and intutive to use	some pages are easy and intutive to use	very few pages are easy and intutive to use	None of pages are easy and intutive to use	The entire team will test the user flow. Gurmilan is currently working on integrating the google api to search for local gym locations	Kyle will make use of the places API through vanilla javascript to allow for gym brand names to be searched. Brandon has also found a solution to implement the payment subscription system
